

AMENDMENT

Please amend the above-identified application as follows:

Amendments to the Claims:

This listing of claims will replace all prior versions, and listing, of claims in the application.

1. (Currently Amended) A method comprising:

 after a software order, sending an e-mail message with an encrypted URL to a user;

 using the encrypted URL to access a web page; and

 downloading a license key from the web page;

 wherein the license key can only be downloaded once from the web page; and

 wherein the web page is deleted after all license keys on the web page are downloaded

 from the web page.

2. (Original) The method of claim 1, wherein the e-mail message also includes an authorization code for use with a web application.

3. (Canceled)

4. (Canceled)

5. (Original) The method of claim 1, wherein the encrypted URL allows for license key download without requiring user login.

6. (Original) The method of claim 1, wherein a web application is used to keep track of software licenses.

7. (Original) The method of claim 6, wherein a copy of the license key can be retrieved from the web application.

8. (Currently Amended) A system comprising:

a memory adapted to store license keys for software; and

a processor adapted to execute a software email construction application to send an e-mail message with an encrypted URL to a user after a software order and to execute a license key download construction application to produce a license key download page for the encrypted URL, wherein the license key download page can be used for downloading one of the license keys;

wherein the license key can only be downloaded once from the web page; and

wherein the web page is deleted after all license keys on the web page are downloaded from the web page.

9. (Original) The system of claim 8, wherein the e-mail message also includes an authorization code for use with a web application.

10. (Canceled)

11. (Canceled)

12. (Original) The system of claim 8, wherein the encrypted URL allows for license key download without requiring user login.

13. (Original) The system of claim 8, wherein a web application is used to keep track of software licenses.

14. (Original) The system of claim 13, wherein a copy of the license key can be retrieved from the web application.

15. (Currently Amended) A computer readable media comprising software to instruct a computer to do the steps of:

after a software order, sending an e-mail message with an encrypted URL to a user;

using the encrypted URL to access a web page; and

downloading a license key from the web page;

wherein the license key can only be downloaded once from the web page; and

wherein the web page is deleted after all license keys on the web page are downloaded from the web page.

16. (Original) The computer readable media of claim 15, wherein the e-mail message also includes an authorization code for use with a web application.

17. (Canceled)

18. (Canceled)

19. (Original) The computer readable media of claim 15, wherein the encrypted URL allows for license key download without requiring user login.

20. (Original) The computer readable media of claim 15, wherein a web application is used to keep track of software licenses.

21. (Original) The computer readable media of claim 20, wherein a copy of the license key can be retrieved from the web application.
